if you like hockey that is heavy in stats then this game is for you. I find it very fun. funny game and it shows up a perfect graphic. interesting story and a little hard controlling.

After all, it is a nice game that everyone should have a try.. For a game about me, I give it a 10V10 for main character accuracy. Terrible english translation though, some things are still in Russian. Enemy names and dialogue choices aren't labeled correctly, or at all. Combat is pretty simple, not very challenging or clear about what's happening.

On a serious note, there's the groundwork for a really nice game here. The dev put some real effort into making something unique, it's just not quite fleshed out and doesn't feel fully completed yet. I hope they keep making games because there's a lot of nice ideas here.. Great Game, I love the enviroment Music for this piece of gold!  
anyway, Thanks for the Music, I bought the Soundtrack too and I love it!

Best Regards from Colombia! ^^ ;)

Bus its very nice and i hope you enjoy the sanarios i will be making with this luxorius train. After a very long wait finally there is something in the place of Rune! The fact that this game is 100% lan-able is great! The one thing chivalry did not do right. Great fun! Easy to get into hard to master. And when you get bored of killing your buddies retire to a good old fassioned game of chess! A rather bloody one that is! If you enjoyed games like The Reconing and Rune and Chivalry this is a must buy!! The price is so good its like if its on sale already!. This is a retro style point and click adventure with a comedy theme.

It's not really that funny and the terrible pixel graphics and glitchy gameplay take away any enjoyment one might get from the storyline.

They want \$10 for it, however, so there's some comedy in that.. In short - for now I would recommend this game if you like NASCAR and/or enjoyed the previous two NASCAR games by Monster.

NASCAR Heat 3 has enough small improvements, that you might even miss at first glance, to make it worthwhile and on top of that there is dirt racing (lot of fun, please release more tracks and/or cars etc - go DLC on this part!!).

The LOD is still mediocre though and the game has a serious lack of pc worthy graphics settings.. The cars seem to handle like they are on ice... uninstalled after the first race

Don't get this game! It reminded me alot of the old Wipeouts from PS1 and looked well presented ,and faithful to its obvious inspiration, on the store page. Alas it seems like a bad port from mobile platforms, atleast it is presented like it and plays just as bad. The gameplay is basically done for you, you can't even turn around on the damned track if you wanted to. It basically auto steer's and aims the same. I came wanting a game faithful to the old wipeouts, and the advertisements promised it, and were presented pretty well, but not at all reflected the actual gameplay. In all, plays like a bad mobile port, presented like one too (on a platform that shouldn't), is completely devoid of any challenge and gamplay that would have bought most people here, and bastardizes it's inspiration.. Please disable that goddamn villians. I've known and loved this game for years, but unfortunately this is a lazy port. This "Steam Edition" doesn't have changes in graphics or interface. No mouse support, no key mapping. In the options you can assign commands to said buttons A B X Y R1/R2 L1/L2, even though you're not informed of what joypad you're supposed to use to play this game. If you don't use a joypad, you eventually find out you are stuck with the keyboard arrows and the keys A and Z. If you want a different mapping, you'll have to download a virtual joystick driver.. Fun but rage producer sometimes depending on how seriously u take it. DAYBREAK STOLE MY MONEY!  
DAYBREAK STOLE MY MONEY!

Put money on my account to restore a charcter and it won't let me after dozens of attempts. Supports answer was "too bad we already have your money, we don't do refunds". They stole my money on a crap game. The game is ok, but I sure don't feel like supporting people who outright steal my money. THEY WILL STEAL YOUR MONEY AND TELL YOU NO REFUNDS!. so after the fixed bugs i decided to give it another try. I repurchased the game and it started just fine. No more weird bugs. I started playing it and it was a ton of fun, even for someone who has never sprayed before and isnt that into art. I did have some crashes/lags, but im sure that will be fixed in the future. The Oculus support is there and it works good!
