#### FEATURES

- Rosetta stone allows you to learn from your computer using your active voice. It is far easier to practice speaking and listening on a computer than it is to talk aloud with a tutor or class, which is why rosetta stone is such an effective tool for learning the english language.
- Speaking aloud is a surprisingly difficult thing for some people to do, especially when they are not sure about their speech. Rosetta stone has a voice recognition feature that allows you to speak and record your speech, allowing you to get feedback on your skill level. When consulting a tutor, you don't get to hear yourself speaking, so this feature is great for improving listening and speaking skills!
- Rosetta stone is great for the english beginner; the program starts with basic words and phrases and then moves forward in difficulty as you progress.
- Rosetta stone is like a personal tutor; it gives you quick feedback and correction every time you make an error. This allows you to correct common errors in grammar and vocabulary early on in your english studies.
- Rosetta stone is a fun way to learn a language! It can be a chore for some people to drill themselves on the rules of a new language, but with rosetta stone, you will be having fun while you're learning!
- Rosetta stone is an excellent resource for students who are struggling with the basics of english. It is so easy to learn from this software.
- Rosetta stone is also an excellent resource for people who are already fairly fluent in english. Using this software will allow you to become more fluent and master common idioms!
